SUMMARY

Operations Research professional with an **M.Tech** from **NIT Durgapur**, with strong knowledge of optimization, mathematical modeling, and data analysis. I am eager to apply my academic knowledge and analytical skills to solve real-world industry challenges, drive decision-making, and improve operational efficiency through practical solutions and collaboration.

EDUCATION

M.Tech in Operations Research

NIT Durgapur

07/2020 - 06/2022 West Bengal, India

GPA

8.34 / 10

- Academic Project:** Bi-Objective 4D Transportation Optimization Problem for Supply Chain and Inventory Management Using Operations Research Techniques.
- Created a mathematical linear programming model** to reduce inventory and transportation costs, maximize profit, and save time in the supply chain process. **Solved the model using MATLAB** and **genetic algorithm techniques** to obtain the **optimal solution**.

B.Tech in Man Made Fiber Technology

Dr. A.P.J. Abdul Kalam Technical University

06/2016 - 06/2020 Kanpur, India

GPA

7.94 / 10

TRAINING/COURSES

Udemy

2022 - 2023 Kolkata

- Optimization with Python
- The Ultimate MySQL Bootcamp
- Web Development Bootcamp

EXPERIENCE

Software Engineer at SSIL

Project: Retail CRM

11/2023 Kolkata

- Developed **client-side and server-side** modules for a Retail CRM web application, improving performance and user experience.
- Integrated **third-party APIs (Digio)** for **PAN and GST verification**, reducing **fake registrations by 12%** to improve data accuracy.
- Improved **data validation** processes to drive **cost optimization** and **operational accuracy**.
- Developed **Backend API Systems** to support over **2,000+ users** enabling efficient expense tracking and management.

Backend Developer at SSIL

Project: Buildistan

01/2023 - 11/2023 Kolkata

- Developed **JWT-based authentication** for user and role management, improving system security and scalability & built APIs for **inventory management**.
- Optimized database queries** to improve data **retrieval time by 15%**, enhancing real-time reporting capabilities.

Management Trainee at SSIL

Ghareka

06/2023 - 01/2023 Kolkata

- Designed and optimized database schemas** to improve performance and ensure data integrity.
- Developed and maintained APIs** for the Ghareka platform, enabling scalability and seamless client-side integration.

TECHNICAL & SOFT SKILLS

Optimization Techniques

Mathematical Modeling

Web and API development

JavaScript

TypeScript

Python

Node.js

Express.js

MySQL

PHP

Laravel

Collaboration & Teamwork

Communication Skills

Problem-Solving

Critical Thinking

Time Management

CORE SUBJECTS AND RELEVANT COURSEWORK::

Advance Operations Research

Advanced Optimization

Decision Theory

Fuzzy Logic

Probability & Statistics

Simulation Modeling

Numerical Analysis

Stochastic Processes

Game Theory

Soft Computing

Supply Chain Management

Data Structure and Algorithms

ACADEMIC ACHIEVEMENTS::

GATE 2020: Secured All India Rank (AIR) 100.
IOCL Scholarship (2013-2015)

RESEARCH AND PAPER PRESENTATION::

Presented a Paper at National Conference on
Science Technology & Management 2022

Paper Entitled Bi-Objective 4D
Transportation Optimization Problem for
SCM.

LANGUAGES

English

Hindi

Nepali.
